

How to apply an Iron on Patch

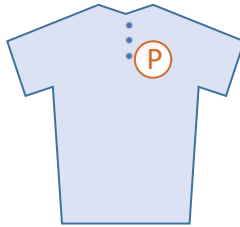

<https://IronOnPatchAustralia.com.au>

1

Heat the iron, without steam to the highest heat setting

2

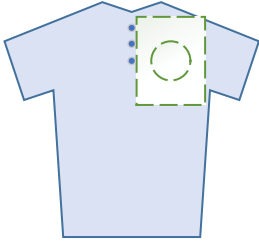

Decide where you want the patch to be applied

3

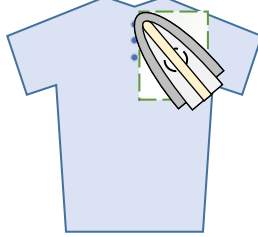

Spray some water on the back of the patch (the glue side)

4

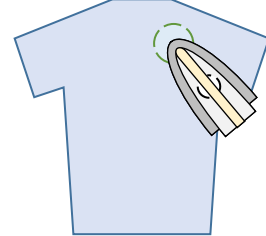

Place thin damp cloth over the front of the patch

5

Iron over the patch while pressing down firmly for 10-20 seconds

6

Turn the material so you can iron from behind the patch, you may need to turn clothing inside out, then iron again over the patch while pressing down firmly for 10-20 seconds

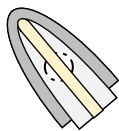

NOTE: In the event that the patch lifts up after repeated laundry cycles, these instructions can be repeated to re-attach
